Dear valued customer,

Unpredictable times, can't change our purpose.
Since 1889 Carhartt exists to protect and serve
hardworking people. That's something that will
never change.

**Also during times of uncertainty, we respect our past,
while walking bravely into the future.**

That is why I would like to use this opportunity to thank
all our customers, across the different regions for their
continued support.

Stay healthy, keep busy.

Albert Foppen

Managing Director EMEA/PAC

TECHNOLOGY REFERENCE

ICON		MARKETING DESCRIPTION	FABRIC DESCRIPTION
	Rain Defender® Durable Water Repellent (DWR)	Amazingly durable and dependably water repellent, moisture beads up and rolls off. Rain Defender® Durable Water Repellent.	Finish that beads water off the surface of a garment.
	Quick Duck®	Carhartt Quick Duck® outerwear: repels the rain, resists the wind. Anything else up your sleeve, Mother Nature?	30% lighter blended cotton, water repellent, and ounce-for-ounce as tough as our legendary sandstone duck.
	Storm Defender®	Waterproof, breathable technology stops water from getting in but lets sweat out	Membrane/laminate applied to the fabric to keep water from reaching the inside of the garment, but also allows sweat/heat to escape.
	Rugged Flex®	Gear made to move in, so whatever you're doing, it's easier to do. Rugged Flex® stretch technology for ease of movement.	Carhartt's rugged stretch designation given to materials that will meet the defined standards for stretch and recovery.
	Wind Fighter®	The wind can whistle, you won't care. You're better protected than a franchise quarterback in a pre-season game. Wind Fighter® technology tames the wind.	Finish or added membrane that keeps wind from going through the fabric and reaching your skin.
	Stain Breaker® Stain Release	Fight dirty with Carhartt Stain Breaker® stain release. These hardworking fibers help send job site stains straight down the drain. Stain Breaker® technology releases stains.	A finish that allows stains to wash out easily.
	Force®	Wicks sweat and dries fast. Force® technology stares down heat and keeps you cool.	Fabric must have Fast Dry® wicking technology and may be combined with the following properties: <ul style="list-style-type: none">- Fights odors- Stain Breaker® stain release- Rugged Flex® stretch- UPF- Wrinkle release
		Full Swing® offers a patented design with stretch across the shoulders, added flexibility in the elbows, and arms that move freely without the jacket riding up. U.S. PAT. 10,143,249. PATS PEND.	Rugged Flex® technology engineered design to provide improved range of motion. Engineered fit to remove bulk and weight.
		Provides a high level of engineered outsole for grip, durability for a wide range of work and safety environments, with excellent heat and tear resistance.	

DISCLAIMER
Our aim is to serve and protect hardworking men. Every attempt has been made to ensure accuracy of the product descriptions/colours in this catalogue at the time of printing. Please note that printed colours displayed in this sales tool may vary from the product colours. Our products and sketches shown in this catalogue are represented as accurately as possible, however we reserve the right to change product specifications or colours without previous notification.

SHELL FABRIC

ALL OUR DUCKS, IN A ROW

Brown duck was the genius creation of Hamilton Carhartt. His brown duck bib overalls for railroad workers revolutionized clothing for the working class. These overalls were first recorded in a 1915 newspaper article that described the new “wonderful brown Carhartt’s.” This brown duck bib is still in the Carhartt stable and remains as popular as it was when originally introduced. Hamilton Carhartt’s brown duck serves as a reminder that great quality never goes out of fashion. Today, we’ve increased our duck line across the board for men’s, women’s and accessories and color, to the advanced technologies and finishes used to fortify the garment, there’s a hardworking duck fabric for every task.

WHAT IS DUCK FABRIC?

Since the introduction of our original brown duck in 1915, Carhartt has developed 8 different variations of our famously durable workwear fabric — currently in use in over 200 rugged Carhartt products. With distinctive properties ranging from fabric strength, weight, rigidity, and color, to the advanced technologies and finishes used to fortify the garment, there’s a hardworking duck fabric for every task. Learn more about our different duck types below.

LEARN MORE ABOUT OUR DIFFERENT DUCK TYPES BELOW.

FIRM DUCK Our strongest cotton duck is the most durable canvas out there. Built with added toughness, firm duck is water-repellent, wind resistant, and rugged. If you like to break in your jackets and pants, firm duck is for you.	
DUCK Good 'ol duck is stiff, ring-spun cotton. If you like your Carhartt solid, classic and durable as the day is long, this is the duck for you.	
WASHED DUCK If you like sandstone duck, you'll like our washed duck. This fabric feels exactly like it sounds — we took our durable, classic duck, and washed it for a broken-in look and feel. It breaks in faster than duck, and looks newer, longer. Find it in gear like our Full Swing® Armstrong Jacket and B11 Washed Duck Work Dungarees.	
SANDSTONE DUCK Sandstone duck is sanded and brushed for softness and comfort. The more you wear it, the more it breaks in—it's comfortable the first day you put it on and more comfortable and worn-in on the 50th. Find it in gear like our Sandstone Active Jac and Mock Neck Vest.	
QUICK DUCK® Quick Duck® is durable, and lighter than traditional sandstone duck. It's built with a durable water repellent, so water beads up and rolls off, and it doesn't require breaking in like sandstone—so your gear will always look fresh.	
RUGGED FLEX® DUCK Rugged Flex Duck gives you the classic Carhartt look, with just the perfect amount of stretch. Made by combining our famous cotton Duck with Rugged Flex® durable stretch technology, the result is increased ease of movement everywhere it's needed, and our most comfortable heavyweight gear yet.	
SUPER DUX 7.75 oz — Nylon canvas with spandex stretch that is built for movement. One of Carhartt's most durable fabrics combines lightweight performance with unmatched durability. Treated with Rain Defender for added weather protection, crafted with Wind Fighter functionality and woven with spandex stretch; for full Rugged Flex performance. The ultimate fabric for those that work hard and play harder.

WOMEN'S

CARHARTT WOMEN'S BODY MEASUREMENTS

HOW TO MEASURE

Bust:
Measure the fullest part of your bust, keeping the measuring tape parallel to the floor.

Natural Waist:
Bend side to side and find the natural bend in your body; this is your natural waist. **Note:** It may not be the smallest point.

Hips:
Measure the fullest part of your hips, approximately 8" below the natural waist.

Inseam:
Measure from your crotch down to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. To get the inseam length, measure on the front from the crotch point, along the seam, to the hem.

For best results, measure over your undergarments.

MEN'S

CARHARTT MEN'S BODY MEASUREMENTS

HOW TO MEASURE

Bust:
Measure the fullest part of your bust, keeping the measuring tape parallel to the floor.

Natural Waist:
Bend side to side and find the natural bend in your body; this is your natural waist. **Note:** It may not be the smallest point.

Hips:
Measure the fullest part of your hips, approximately 8" below the natural waist.

Inseam:
Measure from your crotch down to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. To get the inseam length, measure on the front from the crotch point, along the seam, to the hem.

For best results, measure over your undergarments.

The boots built from the ground up: Carhartt durability, quality and craftsmanship translates directly to our line of work boots, built to keep you dry, comfortable and safe during your workday.

Carhartt safety shoes are of the protection class S3; offering stability, comfort, and lightweight flexibility to all craftsmen. In compliance with the requirements of the EU standard, EN ISO 20345:2012, the S3 shoe offers a fiberglass toe cap that protect against falling objects and the indentation resistance is at least 200 Joules. The S3 shoe also has antistatic properties, increased resistance of water, non-slip Vibram® sole, and anti-perforation that protects the soles of the feet from sharp objects.

3M Scotchlite™ Reflective material reflects light back to its source, making the wearer more visible and therefore safer.

Carhartt Safety shoes of the protection class S1P; offer stability, comfort, breathability and lightweight flexibility to all craftsmen who work indoors or with no risk of water sprays. In compliance with the requirements of EU standards, EN ISO 20345:2012, the S1P shoe offers a fiberglass toe cap that protect against falling objects and the indentation resistance is at least 200 Joules. The S1P shoe also has antistatic properties and anti-static perforation that protects the soles of the feet from sharp objects.

Identifies protection against impact and compression hazards with a fiberglass toe, taking up to 200 joules of force. The lightest toe cap with an ergonomic shape specially designed to adapt to any type of foot, this will ensure comfort and a high precision fit. The Fiberglass Toe meets EN ISO 20345:2012 standards.

These shoes are designed to be completely waterproof and to keep your feet dry in most types of wet conditions. A waterproof and breathable membrane is used to keep your feet dry and warm while wicking moisture away from the foot and promoting air flow and circulation.

Rugged Flex® gear meets Carhartt's defined standards for stretch and recovery to give you extra range of motion so you can move and work easily in Rugged Flex shoes. This can be found in the construction of the sole and the composition of the materials used in the anti penetration textile plate and non metallic thermo palstic polymer shank. These elements provide protection and support whilst both being pliable enough to suit the wearers needs in the work place.

The Scuff cap offers more durability to a popular wear point on the shoe. It provides long term protection to your shoes without adding extra weight.

Performance shank provides extra stability.

These shoes are designed with lightest weight materials, to provide a lightweight fit to help keep you strong throughout your work day.

The Anti-penetration plate has anti perforation properties which protects against penetration of sharp objects.

Vibram® outsole provides performance with a non-slip antistatic compact polyurethane sole for the intended work and environment. The outsole also has resistance to heat, abrasion, oil and ammonia.
